INTRODUCTION

« Curious, a jack of all trades — the desire to learn has always been my driving force. Beyond my university background, I am self-taught in many fields, which today allows me to approach new learning with serenity and enthusiasm. »

LANGUAGES

FRENCH Native
ENGLISH Fluent
SPANISH Good level
ROMANIAN Basics

USE OF AI

« The AI tools that have gradually appeared in recent years open up fields of competence previously unimaginable to everyone. The risk, however, is major: finding ourselves quickly enslaved by ever more greedy, even voracious, business models. Like everyone else, I use these mainstream AIs for my daily activities, but learning local tools and models will soon become an obligation that I will have anticipated. »

« I rely on artificial intelligence tools to automate project management, improve web referencing (SEO), and analyze data related to electromagnetic diagnostics. »
